

RST Visual Command And Diapatching System APP For MESH Device Management Emergency Communication

Our Product Introduction

for more products please visit us on zkmanet.com

Basic Information

- Place of Origin: Shenzhen, China
- Brand Name: ZKMANET
- Certification: CE, ISO9001
- Model Number: ZKManet8794
- Minimum Order Quantity: 1
- Price: USD 69~99
- Packaging Details: Brown Carton
- Delivery Time: 5~8 working days
- Payment Terms: T/T, Western Union
- Supply Ability: 10000 pieces per year

Product Specification

- Type: Software
- Video Call: Support
- Audio Call: Support
- Clust Command And Dispatch: Support
- Playback Query: Support
- Live Preview: Support
- Highlight: **RST Visual Command and Diapatching System, Diapatching System APP, MESH Device Management**

Product Description

RST Visual Command and Diapatching System APP for MESH Device Management and Emergency Communication

Product Description

ZKManet8794 is a mobile intelligent terminal software developed based on the Android system, which is installed in the

Our Pro

intelligent terminal of the Android system, which is used to cooperate with the multi-network fusion visual emergency rescue command and dispatch platform to realize the video call and voice intercom between the back-end command terminal and the front-end mobile intelligent terminal.

Features

- * Supports video call
- * Supports audio call
- * Supports picture/audio/video sending
- * Supports video capture

Specifications

- * Supports load balancing and intelligent self-management.
- * Supports multiple fine-grained permission controls for users.
- * Using advanced media stream coding and decoding technology, the media stream occupies lower bandwidth with the same audio and video quality.
- * Supports massive distribution of audio and video streams to ensure low latency and high quality of audio and video.
- * Supports organizational structure division of users and terminals to facilitate use and management.
- * Supports powerful plan storage and linked storage, and the stored data is fully encrypted to ensure the security of user information.
- * Supports multiple alarm sources, can record various alarm events in the system, and can trigger multiple alarm linkages.
- * Supports cluster command and dispatch functions such as cluster calls, video dispatch, voice dispatch, GIS map dispatch, etc.

Company Profile

Zhongke Lianxun (Shenzhen) Technology Co., Ltd is a high-tech R&D enterprise. Our products mainly use Mesh and LTE as core technologies and auxiliary decision-making software to form underground building emergency communication systems, and police investigation communication systems, and police non combat training communication systems, urban emergency communication systems, emergency communication vehicle communication systems, etc., suitable for law enforcement forces and government departments such as public security, armed police, forest fire prevention, civil air defense, and maritime. Especially the intelligent communication products of special robots have solved the long-distance communication and control problems of robots in complex environments.

We have multiple patents with independent intellectual property rights, has established a sound quality system and national standard system that comply with ISO9001 standards, and strictly produces products in accordance with national standards and internationally recognized standards such as CCC, CE, FCC, etc. It has obtained the Radio Transmission Equipment Model Approval Certificate issued by the Ministry of Industry and Information Technology of China and has passed the wireless product testing certification of the Ministry of Public Security.
