Product Description

Our Pro

4G Bluetooth WiFi Transceiver GPS/BD Positioning Handheld Mesh Radio with 30Mbps Data Rate

Product Description

The ZKManet2111UM is a professional intelligent terminal that supports MESH, 4G, WIFI, Bluetooth and DMR intercom. It can do HD video transmission and voice communication simultaneously, and it takes into account the functions of remote monitoring (satellite positioning, audio and video capture and upload) and command information interaction. In addition, the terminal has daily essential functions such as calling and sending text messages, and supports the installation of third-party applications. It can be applied to Public Security, Armed Police, Fire Control, Civil Air Defense andto establish real-time and rapid communication and unified coordination and command.

Features

* MESH, 4G and DMR intercom integrated
* Supports WIFI, Bluetooth and GPS/BD
* AES encryption
* Ruged IP68
* Buckle design frees both hands
* Compact size and light weight
* Flexible networking and rapid deployment

Company Profile

Zhongke Lianxun (Shenzhen) Technology Co., Ltd. was established in 2005. We focus on the research and development of products for drone defense/control, wireless video transmission, and network security encryption/decryption. With excellent quality and advanced technology, we provide comprehensive network communication solutions to our customers.

Our chief scientist team, led by professors from the Network Security Institute of Wuhan University, has achieved remarkable results in the development of man-in-the-middle platforms for network security. The company currently offers platforms such as a drone denial system platform, long-distance wireless video transmission platform for drones, network encrypted data analysis platform, IPSEC man-in-the-middle platform, and SSH man-in-the-middle analysis platform.

We provide design and development services for internet big data collection and analysis products and application solutions to large enterprises and institutions with confidentiality needs. Additionally, we offer sales of network security equipment and information security technical services. Our products are widely used by law enforcement forces and government departments such as public security, armed police, , forest fire prevention, civil air defense, and maritime affairs.
