

800MHz/1.4GHz/2.4GHz Drone Data Link Up To 30Mbps With AES 128/256-Bit Encryption

Our Product Introduction

for more products please visit us on zkmanet.com

Basic Information

- Place of Origin: Shenzhen
- Brand Name: ZKMANET
- Certification: CE
- Model Number: ZKMANET2441UM
- Minimum Order Quantity: 1
- Price: 800
- Packaging Details: Carton
- Delivery Time: 15days
- Payment Terms: TT, L/C, D/A, D/P, Western Union, MoneyGram
- Supply Ability: 10000pcs/year

Product Specification

- Size: 113*84*38mm
- Weight: 450g
- Output Power: 2w
- Power Supply: 12V DC
- Frequency Band: 800MHz/1.4GHz/2.4 GHz
- Transmission Range: Up To 15 Km
- Data Rate: Up To 30 Mbps
- Type: Data Link System
- Highlight: 1.4GHz Drone Data Link,
2.4GHz Drone Data Link,
30Mbps Drone Data Link

Product Description

Product Description:

The Drone Data Link is powered by a 12V DC power supply, providing reliable and efficient performance every time. The system features an output power of 2w, allowing for clear and efficient communication between the drone and the operator. With a size of 113*84*38mm, this system is the perfect size for any drone kit, providing the ideal balance of performance and convenience.

One of the standout features of the Drone Data Link is its ability to function as an anti-drone system. The system is designed to detect and prevent unauthorized drones from entering restricted airspace, making it an essential tool for security and law enforcement personnel. With its advanced technology and powerful performance, the Drone Data Link is the ultimate solution for anti-drone protection. Whether you're a professional drone operator or a hobbyist, the Drone Data Link is an essential addition to your kit. With its exceptional performance and versatility, this state-of-the-art data link system provides a level of control and communication that is unmatched in the industry. So why wait? Add the Drone Data Link to your drone kit today and experience the ultimate in drone control and communication!

Features:

Product Name: Drone Data Link

Transmission range: 10-30km

Weight: 450g

Output power: 2w

Encryption: AES 128/256-bit

Data Rate: Up To 30 Mbps

Features:

Anti Drone System

Drone Wireless Video Transmitter

Drone Detection Device

Technical Parameters:

Type	Data Link System
Power Supply	12V DC

Data Rate	Up To 30 Mbps
Size	113*84*38mm
Output power	2w
Transmission range	10-30km
Weight	450g
Encryption	AES 128/256-bit
Data port	Support
Frequency Band	800MHz/1.4GHz/2.4 GHz

The Drone Data Link is a powerful and reliable drone wireless video transmitter that is perfect for commercial drone UAV applications. With a data rate of up to 30 Mbps, an output power of 2w, and a transmission range of 10-30km, this drone video transmitter is capable of handling even the most demanding video and data transmissions. In addition, the Drone Data Link features AES 128/256-bit encryption, data port support, and operates on three different frequency bands (800MHz/1.4GHz/2.4 GHz) for maximum versatility.

Applications:

ZKMANET drone data link product ZKMANET2441UM is a high-quality and reliable product that can meet the needs of various drone accessories, anti-drone system, and other similar applications. The product is designed and manufactured in Shenzhen and has obtained the CE certification, ensuring its quality and safety. The minimum order quantity for this product is 1, and the price is \$800.

The drone data link product is packaged in cartons and has a delivery time of 15 days. Payment terms are TT, and the annual supply ability is 10000pcs/year. The drone data link product has a transmission range of 10-30km and uses a 12V DC power supply. The transmission range can reach up to 15 km, and the product has AES 128/256-bit encryption to ensure data security. The data rate can reach up to 30 Mbps.

The drone data link product can be used in various scenarios, including but not limited to:

Drone Surveillance: The drone data link product can be used to transmit the video and images captured by the drone's camera to the ground station in real-time, providing the operators with the necessary information for surveillance and monitoring.

Search and Rescue: The drone data link product can be used to transmit the location and other relevant information of the missing person or object to the ground station, allowing the rescue team to locate and rescue them quickly and efficiently.

Agriculture: The drone data link product can be used to transmit the data collected by the drone's sensors, such as temperature, humidity, and soil moisture, to the ground station, providing farmers with the necessary information for crop management.

Anti-Drone System: The drone data link product can be used in an anti-drone system to detect and track unauthorized drones and transmit the necessary information to the ground station, allowing the authorities to take appropriate actions.

In conclusion, ZKMANET drone data link product ZKMANET3622 is a high-quality and reliable product that can meet the needs of various drone accessories, anti-drone system, and other similar applications. It has a long transmission range, high data rate, and AES encryption to ensure data security. It can be used in various scenarios, providing operators with the necessary information for surveillance, search and rescue, agriculture, and anti-drone system.

Customization:

Our products are manufactured in Shenzhen and are CE certified, ensuring high-quality performance. The minimum order quantity for our Drone Data Link System is 1 unit, and the price is \$800. Our packaging details include carton packaging, and the delivery time is 15 days. Payment terms are TT, and our supply ability is 10,000pcs/year.

Our Drone Data Link System has a transmission range of 10-30km and a data rate of up to 30 Mbps, making it a reliable and efficient solution for drone data transmission. The power supply is 12V DC, allowing for easy installation and use.

Support and Services:

The Drone Data Link product comes with a comprehensive technical support and services package to ensure our customers have a smooth and efficient experience with our product.

Our technical support team is available for any troubleshooting or inquiries related to the product, and can be reached through email or phone.

In addition, we offer installation and training services to assist customers in setting up and using the product effectively.

For customers who require further customization or integration with other systems, we also provide consulting services to tailor the product to their specific needs.

Our goal is to provide the highest level of support and services to our customers, ensuring they have a seamless experience with the Drone Data Link product.

Packing and Shipping:

Product Packaging:

The Drone Data Link product will be packaged securely to ensure that it is not damaged during transportation. The product will be placed in a sturdy box with adequate padding to prevent any impact or shaking. The box will also include a user manual and safety instructions for the user's convenience.

Shipping:

We use reliable shipping partners to ensure that the Drone Data Link product is delivered to our customers in a timely and efficient manner. The shipping cost will vary depending on the destination and shipping method selected by the customer. Once the product has been shipped, the customer will receive a tracking number to monitor the status of the delivery.

FAQ:

Here are the frequently asked questions and answers about the ZKMANET2441UM Drone Data Link:

Q: What is the ZKMANET2441UM Drone Data Link?

A: The ZKMANET2441UM Drone Data Link is a device that transmits real-time data from a drone to a ground station. It is designed to provide reliable and stable communication for drone operations.

Q: Where is the ZKMANET2441UM Drone Data Link manufactured?

A: The ZKMANET2441UM Drone Data Link is manufactured in Shenzhen.

Q: Is the ZKMANET2441UM Drone Data Link certified?

A: Yes, the ZKMANET2441UM Drone Data Link is certified by CE.

Q: What is the minimum order quantity for the ZKMANET2441UM Drone Data Link?

A: The minimum order quantity for the ZKMANET2441UM Drone Data Link is 1.

Q: What is the price of the ZKMANET2441UM Drone Data Link?

A: The price of the ZKMANET2441UM Drone Data Link is 800.

Q: What are the packaging details for the ZKMANET2441UM Drone Data Link?

A: The ZKMANET2441UM Drone Data Link is packaged in cartons.

Q: What is the delivery time for the ZKMANET2441UM Drone Data Link?

A: The delivery time for the ZKMANET2441UM Drone Data Link is 15 days.

Q: What are the payment terms for the ZKMANET2441UM Drone Data Link?

A: The payment terms for the ZKMANET2441UM Drone Data Link are TT.

Q: What is the supply ability for the ZKMANET2441UM Drone Data Link?

A: The supply ability for the ZKMANET2441UM Drone Data Link is 10000pcs/year.
