

10-30 Km Transmission Range Drone Detection Device System with AES Encryption

Our Product Introduction

for more products please visit us on zkmanet.com

Basic Information

- Place of Origin: Shenzhen
- Brand Name: ZKMANET
- Certification: CE
- Model Number: ZKMANET2441UM
- Minimum Order Quantity: 1
- Price: 800
- Packaging Details: Carton
- Delivery Time: 15days
- Payment Terms: TT, L/C, D/A, D/P, Western Union, MoneyGram
- Supply Ability: 10000pcs/year

ZKMANET

Product Specification

- Encryption: AES 128/256-bit
- Frequency Band: 800MHz/1.4GHz/2.4 GHz
- Transmission Range: 10-30km
- Transmission Range: Up To 15 Km
- Power Supply: 12V DC
- Data Rate: Up To 30 Mbps
- Size: 113*84*38mm
- Type: Data Link System
- Highlight: **AES Encryption Drone Detection Device, 30 Km Drone Detection Device, Drone Detection Device System**

Product Description

Product Description:

The Drone Data Link System is equipped with advanced AES 128/256-bit encryption, providing the highest level of security for your drone data. This ensures that your data remains private and secure, protecting your business from potential data breaches. With a powerful output of 2w, this device is capable of transmitting data over long distances without any loss of quality. This makes it an ideal choice for businesses that require long-range drone operations.

The Drone Data Link System comes with a 12V DC power supply, making it easy to integrate into your existing drone setup. The device is easy to install and can be used with a wide range of drones, making it a flexible solution for businesses of all sizes. With a transmission range of 10-30km, this device allows for long-range drone operations, making it ideal for businesses that need to cover large areas. Our Drone Data Link System is ideal for businesses that need to transfer large amounts of data during drone operations. Whether you need to transmit live video feeds or other data, this device can handle it all with ease. With its advanced encryption and high output power, your data will remain secure and your drone operations will be more efficient than ever before.

In conclusion, the Drone Data Link System is the perfect choice for businesses that need reliable drone data transfer. Whether you need to transmit live video feeds or other data, this device can handle it all with ease. With its advanced encryption, high output power, and long transmission range, this device is ideal for businesses that require long-range drone operations. So why wait? Order your Drone Data Link System today and take your drone operations to the next level!

Features:

Product Name: Drone Data Link

Data Port: Support

Frequency Band: 800MHz/1.4GHz/2.4 GHz

Size: 113*84*38mm

Weight: 450g

Encryption: AES 128/256-bit

This Drone Data Link product is ideal for use as a Drone Detection Device for commercial Drone UAV operations. With its support for various frequency bands and encryption options, it ensures secure and reliable data transmission. The compact size and lightweight design make it easy to install and use for any Drone UAV application.

Technical Parameters:

Attribute	Value
Type	Data Link System
Frequency Band	800MHz/1.4GHz/2.4 GHz
Data port	Support
Data Rate	Up To 30 Mbps
Weight	450g
Power Supply	12V DC
Transmission range	10-30km
Size	113*84*38mm
Transmission Range	Up To 15 Km
Encryption	AES 128/256-bit

Applications:

ZKMANET Drone Data Link ZKMANET2441UM is a high-quality drone video transmitter that provides a reliable and secure communication link between a drone and the ground control station. The product is manufactured in Shenzhen and is certified with CE, ensuring high-quality standards. The minimum order quantity for the product is 1, and it is priced at \$800 per unit. The Drone Data Link is an essential product for drone enthusiasts and professionals who require a reliable and secure communication link between their drone and the ground control station. It is suitable for a wide range of applications, including aerial photography, surveillance, inspection, and mapping. The product is a must-have drone accessory that enhances the performance and capabilities of any drone.

The Drone Data Link is an ideal drone detection device that provides a secure communication link between the drone and the ground control station. The product uses AES 128/256-bit encryption to ensure secure data transmission. It also supports data port, making it easy to connect to other devices. The power supply for the device is 12V DC, and the product weighs 450g. The size of the product is 113*84*38mm, making it compact and easy to carry.

The Drone Data Link is packed in a carton and has a delivery time of 15 days. The product is available on a TT payment term and has a supply ability of 10000pcs/year. The product is suitable for a variety of occasions and scenarios, including aerial photography, surveillance, inspection, and mapping. Whether you are a drone enthusiast or a professional, the Drone Data Link is an essential product that will enhance the performance and capabilities of your drone.

Support and Services:

The Drone Data Link product technical support and services include:

- Assistance with product installation and configuration
- Troubleshooting and resolution of technical issues
- Regular software updates to ensure optimal performance
- Access to online resources and documentation
- Training and education on product features and capabilities
- Repair and maintenance services as needed

Packing and Shipping:

Product Packaging:

The Drone Data Link product comes in a compact and sturdy box to ensure the safe delivery of the product. The packaging includes the following items:

- Drone Data Link device
- Antenna
- Power cable
- User manual

Shipping:

The Drone Data Link product will be shipped within 1-2 business days after the order is placed. We offer free shipping and the estimated delivery time is 5-7 business days. We use reliable shipping carriers to ensure the safe and timely delivery of the product to our customers.

FAQ:

- A: The brand name of the drone data link product is ZKMANET.
2. Q: What is the model number of the drone data link product?
- A: The model number of the drone data link product is ZKMANET2441UM.
3. Q: Where is the drone data link product manufactured?
- A: The drone data link product is manufactured in Shenzhen.
4. Q: Does the drone data link product have any certification?
- A: Yes, the drone data link product is certified with CE.
5. Q: What is the minimum order quantity for the drone data link product and what is the price?
- A: The minimum order quantity for the drone data link product is 1 and the price is 800.
6. Q: What are the payment terms for the drone data link product?
- A: The payment terms for the drone data link product is TT.
7. Q: What is the supply ability of the drone data link product?
- A: The supply ability of the drone data link product is 10000pcs/year.

8. Q: What are the packaging details and delivery time for the drone data link product?

A: The packaging details for the drone data link product is carton and the delivery time is 15 days.
